**Rescission Of Technical Guidance #TG99-002
April 21, 2004**

Background: On April 7, 1999, Rule 331 was revised to include Section 308.1(c)(2), a requirement that flush cleaning of aerospace components comply with Rule 331. However, Rule 348 (Aerospace Manufacturing And Rework Operations) required that flush cleaning of aerospace components comply with Rule 348. Consequently, Technical Guidance #TG99-002 was created in May 1999 by the Rules Clarification Committee to clarify that flush cleaning of aerospace components must comply with Rule 348 and not with Rule 331.

Conclusion: Rule 331 was revised on April 21, 2004. Revisions included re-writing Section 308.2(c)(2) to read: "Wipe cleaning of aerospace components is subject to Rule 348 of these rules, whereas the cleaning of aerospace components in a dip tank or a cleaning machine is subject to Rule 331". With this revision, Technical Guidance #TG99-002 is hereby rescinded.
